

CR PORTABILITY: IT'S ABOUT TIME, IT'S ABOUT SPACE

INTRODUCING THE

HPX-PRO

In mobile imaging environments, portability and workflow are critical. Many CR systems are referred to as portable, but if you've ever had to carry them to the job site or fit them into a mobile darkroom, you realize they aren't so portable. That's why Carestream NDT created the next generation of truly portable CR systems; **HPX-PRO**. Not only does it have the smallest footprint in the industry, but it can be carried with one hand or with a shoulder strap and easily fits into a mobile darkroom. Designed for high production image processing, exceptional image quality, rapid analysis and annotation, simple file sharing, and automated custom reporting, Carestream's HPX-PRO is redefining the portable CR space.

PRO Professional.
FORMANCE Productive.
IN NDT Proactive.
